ANATOMIC PATHOLOGY MARKET

" Anatomic Pathology Market worth \$44.4 billion
by 2024 "

The growth in this market is majorly driven by the high incidence of cancer and other target diseases, availability of reimbursement, and the growing focus on personalized medicine. However, the availability of refurbished products, the lack of skilled professionals, and product recalls are expected to hamper market growth to a certain extent during the forecast period.

Services segment to witness the highest growth during the forecast period

By product & service, the market is segmented into services, instruments, and consumables. The services segment accounted for the largest market share in 2018 and is expected to register the highest CAGR during the forecast period. The growth of this segment can be attributed to the availability of reimbursements for diagnostic tests, rapid growth in the geriatric population, and the increasing incidence of cancer and other chronic diseases.

Disease diagnosis segment accounted for the largest share of the anatomic pathology market, by application, in 2018

Based on application, the market is segmented into [disease diagnosis](#) and medical research. The market for disease diagnosis is further segmented into cancer and other diseases. In 2018, the disease diagnosis segment accounted for the largest market share. This can be attributed to the rapid growth in the geriatric population and the increasing incidence of cancer and other chronic diseases.

North America is the largest regional market for anatomic pathology

Based on region, the market is segmented into North America, Europe, the Asia Pacific, and the Rest of the World. In 2018, North America accounted for the largest market share, followed by Europe. The easy accessibility to advanced technologies, government initiatives for screening cancer patients, favorable reimbursement scenario for anatomic pathology diagnostic tests, increasing healthcare expenditure, and the presence of high-quality infrastructure for hospitals and clinical laboratories in the region are the major factors driving the growth of the market in North America.

Prominent players in anatomic pathology market are F. Hoffmann-La Roche Ltd. (Switzerland), Danaher Corporation (US), Thermo Fisher Scientific (US), Hologic, Inc. (US), Agilent Technologies (US), Becton, Dickinson and Company (US), Sakura Finetek (Japan), Merck KGaA (Germany), Bio SB (US), Diapath S.p.A. (Italy), and BioGenex Laboratories (US).
