# **Best Decorative Concrete Services in Albany NY**

# Concrete Staining Saratoga

- Acid staining is a chemical reaction where the surface of the concrete is coated with a very small amount of muriatic acid in combination with mineral salts to produce a coloration of the concrete.
- Results vary in earth tones left on the surface of the concrete by the process.
- The finished process leaves your concrete with a uniquely mottled and natural appearance.

# Concrete Staining

- Staining concrete is one of the most popular applications for transforming concrete slabs.
- Often referred to as colored concrete, because of the unique outcome that can be achieved combining colors, application techniques, etc., on cement flooring and other substrates.
- The results are limited only by the creativity of those involved in the stained concrete process.

# Concrete Counter Tops

- Kitchen and bathroom counter tops may never be the same, thanks to a common material called concrete.
- Featured in high-end kitchen magazines, concrete has become the material of choice for more and more homeowners and professionals who see the expressive and functional elements of concrete counter tops.
