NeverBounce vs. Bounceless

Bounceless

Bounceless is a tool specially designed to check and update your contacts before carrying out an emailing campaign. This is the must to reduce your bounce rates and significantly increase the deliverability of your emails to your customers.

Prices:

You can choose the plan that suits you according to your budget. Spend less than \$ 20 to check 2,500 emails.

However, you have the choice between picking a monthly or annual subscription.

Bounceless also offers a special rate for startups.

Why choose never bounce

Neverbounce allows you to check email addresses and clean your contact database, all in a non-contractual way. Everything is deployed using a very well-documented API.

The tool uses an exclusive real-time cleaning process of more than 20 steps.

Specificities:

- Real-time verification for entering an individual and bulk email address for lists of all sizes
- 3 minutes for processing a list of 10,000 emails with a 94.44% accuracy rate
- Immediate integration with the main messaging platforms
- Drag-drops information that you want to appear on your Dashboard

Price:

- Free version: 1000 emails per month + Test your free lists before treatment
- Pay-as-you-go: Decreasing credit rate that does not expire

- Average price
