**The Benefits of Having
ENERGY STAR Rated HVAC Products**

When you want to buy a new heating and cooling system for your house, choosing products labelled with the ENERGY STAR will be an important decision. The label ensures better performance and a high saving option on your energy consumption. If you want to know more details about the ENERGY STAR, you can contact an HVAC company near you. The company will share all the important details about your heating and cooling. JetAirCo is a renowned company offering heating and air conditioning maintenance services in Long Island, New York.

The U.S. Environment Protection Agency (EPA) sets the standard for the ENERGY STAR rating, which helps users save money and energy without decreasing the performance of their HVAC unit. These products contribute a lot in reducing the emission of greenhouse gasses that harm the environment. ENERGY STAR level will be perfect for your HVAC systems, and you can also buy different products with the ENERGY STAR label, including lighting, appliances, consumer electronics, and more.

Here, we have shared everything that you want to know about installing the ENERGY STAR rated heating or cooling systems. Remember that JetAirCo is always with you in your needs. You can give us a call, and our experts will visit your place to analyse your environment. We also offer a Commercial Air Conditioning Maintenance service.

Installation is an important step that can increase or decrease the performance of your HVAC systems. So, always hire an experienced team for your system to avoid any faults and further damages. Here are some tips that you can follow to get the installation work done properly.

Find the right name:

Choose the right name for your HVAC systems with years of experience in your HVAC systems' installation and repair work. Choose a licensed company that will ensure your all work. The right HVAC company will always provide you with the basic details regarding your work in written form. The company also has certification for refrigerant handling. Your chosen HVAC company will spend enough time assessing your requirements and give you the best solutions.

JetAirCo is a renowned name in the field, offering an array of services for your HVAC requirements. We offer Air Conditioning Maintenance in Long Island and other parts of New York.

Install a programmable thermostat:

A programmable thermostat allows you to save energy consumptions by offering four pre-programmed settings that help you regulate your home temperature in summer and winter. You can set a different temperature when you are away from your home, asleep, and stay in your home. Use this programmable thermostat perfectly for meeting your requirement.

Seal and insulate:

Ducts are attached to heat pumps and air conditioning system, and often it gets leaked and damaged. So, insulate your ducts fast to protect your system.

Hire an experienced company for your HVAC maintenance services. We offer Air Conditioner maintenance in Northport and other parts of New York. Hire the best installation service and take care of your system. If you need any help, please contact us.
