

The Lisa King Collection

Top Trending Pumps Shoes for Women in 2021

[The Lisa King Collection](#)

Lisa King's trending ladies pumps shoes are one of our biggest sellers due to their sporty flexible soles. We designed it this way due to a large portion of our customers being busy ladies in South Africa that desire to feel fantastic while on the go. These best trending ladies pumps facilitate ease of movement for working moms, hustling business ladies, dedicated students and basically for all our inspiring go-getters!

These **ladies pumps from South Africa** are another very comfortable shoe from our exclusive collections that fold in half, making them great for traveling or if you have limited cupboard space. As travel is slowly starting to open up now as the Coronavirus eases in certain countries, our trending ladies pumps shoes will be the perfect solution to your packing struggles as these pumps barely take up any luggage space. Therefore, you will have more space to bring your other favourite shoes as let's be honest, you can never really have enough! I am lucky enough to have these best ladies pumps shoes in nearly every colour and I am always amazed at how many I can fit into my luggage without consuming much space at all.

Our trending **ladies pumps shoes in South Africa** have gained constant positive feedback due to their ability to be worn up or down. As mentioned above, many ladies purchase pump shoes as a luxurious everyday shoe that they can run around in while still feeling fabulous. South African ladies with this purchasing goal commonly select our tan pump options, princess pumps or simplistic nude designs. However, we also have many beautiful South African ladies that purchase the trending pumps as a statement piece only to be worn on special occasions. As some of the designs from our ladies pumps range are bright and embellished with pearls and sequins, providing you with an opulent shoe that you will not find anywhere else.

One of my best trending ladies pumps in this collection to wear at an expressive event is our red-orange fish scale point pumps. They have a pointed toe and a gold wrap around ankle jewellery piece attached which is like nothing I have ever seen before! Sometimes I think to myself did I have more fun designing these pump shoes than I do now when wearing them?! They have a very sexy edge and the best part is they are still super comfortable and can be worn with anything - jeans, pants, skirts or dresses.
