

# WHY YOU NEED REGULAR DENTAL CHECKUPS?

## PROFESSIONAL CLEANING

Hygienist uses professional tools to keep your teeth and gums healthy by regular cleaning, exams, which improves your overall appearance.

## CHECK FOR CAVITIES

Regular dental checkups can detect cavities, decay or broken fillings. If left untreated, it may result in root canal, surgeries or removal of teeth.

## ORAL CANCER PREVENTION

The dentist will examine your neck, tongue, throat, and detect early signs of potential oral cancer or swelling to prevent spreading.

## BAD BREATH

It can be caused by poor oral hygiene or gum disease. This kind of problem can be addressed and prevented by regular dental checkups.

## AVOIDS TEETH LOSS

If plaque is stuck to your tooth for a long time it destroys your bone that supports teeth, regular brushing will avoid tooth loss.
